Dongare 

Portfolio 

🎯 Objective

Inspiring Data Engineer eager to learn and contribute by building and maintaining efficient data pipelines using SQL, Python, and cloud technologies

🎓 Education

University Of Mumbai	Mumbai, India
Bachelor of Engineering in Information Technology	Oct 2021
Maharashtra State Board of Secondary and Higher Secondary Education	Thane, India
12th Class	Feb 2014
Maharashtra State Board of Secondary and Higher Secondary Education	Thane, India
10th Class	April 2012

☰ Skills Summary

- **Languages:** Python, SQL, JavaScript
- **Frameworks/Libraries:** NumPy, Pandas, Matplotlib, PySpark (DataFrame API)
- **Data Engineering Tools & Technologies:** SQLite, YARN, Apache Spark, Hadoop HDFS, ETL Concepts, Git
- **Cloud & Platforms:** Jupyter Lab, Google Collab, Google Cloud Platform (Hadoop Cluster), Databricks (Basic), GitHub
- **Databases:** MySQL, SQL Server, MongoDB
- **Other Tools:** Excel, Notion, Figma
- **Soft Skills:** Quick Learning, Adaptability, Teamwork

🔗 Projects

RetailSync Analytics: E-commerce Data Analysis April 2025

- Used SQL to deeply analyze e-commerce data and find useful business insights.
- Created 13 small and organized SQL scripts to check product categories, sales performance, trends, customer groups, and reports.
- Applied advanced SQL methods like window functions, totals, if-else logic, and running totals using SQL Server.
- Found key insights such as customer details, best-selling products, sales patterns, and target customer groups for marketing.

Exploratory Data Analysis on Cricket Data Feb 2025

- Conducted Python-based exploratory data analysis (EDA) on IPL cricket data using Pandas, NumPy, Seaborn, and Matplotlib in Jupyter Notebook.
- Analyzed match-level and ball-by-ball data to uncover insights like sixes hit per season and team performance trends.
- Visualized batting trends with bar plots and provided statistical summaries showcasing data manipulation and sports analytics skills.
- Handled large datasets with 756 matches and 179,078 deliveries, addressing missing values and dataset structure for clean analysis.

CodePen Clone: A Code Editor Feb 2024

- Created an interactive platform allowing users to write HTML, CSS, and JavaScript code with real-time preview capabilities.
- Enabled authentication via Google and GitHub, streamlining user access and login.
- Introduced a feature for users to save and manage their projects directly from their dashboard.
- Integrated auto-suggestion functionality within the code editor to enhance coding productivity and accuracy.
- Employed technologies such as JavaScript, React, Redux, Firebase, Firebase Tools, and React Router for implementation.

Craft My Resume: A Resume Builder April 2024

- Developed a web application that enables users to create personalized resumes by choosing from various templates, editing them, and downloading in JPEG, PDF, SVG, and PNG formats.
- Implemented features allowing users to save favorite templates and like them.
- Integrated Google and GitHub authentication for user login.
- Enabled users to save their edited templates for future use, ensuring easy access and management.
- Utilized technologies such as JavaScript, React, Firebase, React Query, Tailwind CSS, and HTML-to-Image.

🌟 Certification

Big Data Engineering Bootcamp with GCP, and Azure Cloud

Udemy - In process

Data Analyst

Develearn IT Institute, Thane

Certification of Completion of Git and GitHub

Great Learning Academy

Certificate URL: <https://verify.mygreatlearning.com/verify/DKPFJOEA>

Certification of Excellence in JavaScript

Scalar Academy

Certificate URL: <https://moonshot.scaler.com/s/li/4tkIPcSV3X>
